

## PHOTOLUMINESCENT SAFETY PLANS

### Jalite Photoluminescent Life Saving Appliance (LSA) / Fire Fighting Equipment (FFE) Plans

Bespoke photoluminescent safety plans are manufactured to defined customer requirements, the completed safety plan is then typically housed in one of the following weather resistant plan cases. Glass fibre reinforced plastic plan case offers moderate protection against adverse weather conditions typically encountered within an offshore environment.

316L Stainless Steel plan case offers outstanding protection against adverse weather conditions typically encountered with the offshore industry. The robust design and material selection maximises corrosion resistance to keep your safety plan conspicuous for longer.
